

Ordering a 40-String Roma Bella Harp

Updated: March 7, 2024

Frequently asked questions...

What comes with the 40-String Roma Bella Harp?

The **40-Roma Bella Harp** starts at a very low C (see range chart below) and goes to a high “g” and is 6’ tall, 22” wide, 3’ deep, and weighs about 50 lbs (the type of wood selected will determine total weight). This harp has an amazing volume and resonance to it. We give a set of just the nylon strings (does not include the low wound strings) and a tuning wrench.

Shown, left, in walnut with a high-gloss finish.

Shown, right, in figured walnut with a high-gloss finish and a rose bud top.

See order form for prices.

What woods are used to make this harp?

Our harps are made of cherry, walnut or exotic woods like: Padauk, African Mahogany, figured walnut, or figured maple. All the woods mentioned above are different prices, so check out the order form.

What kind of finish do you use on this harp?

A semi-gloss finish is the standard, but we can do a high-gloss finish for an extra fee. Both the semi-gloss and high-gloss finish protect the harp, but the high gloss finish is more shiny and makes the harp look darker. The high-gloss has many coats of finish, so there are more hours involved, so the cost is more.

See the order form for prices.

Can I add a Mic Pick-up?

Yes, for an extra fee we can add a mic pick-up which includes K&K Big-Twin transducers added to the inside of the sound board, and a metal jack on either the right or left side (bottom) of the harp.

What kinds of levers are available for this harp?

**Top: Gold Truitt Levers
Bottom: Gold Forte Levers**

**Top: Gold Camac Levers
Bottom: Silver Camacs**

Silver Rees Levers

Note: You can get a full set of levers or partial (such as C+F's or C,F+B) For prices see order form.

Can I get a padded case for this harp?

You can purchase a special padded case from us. We have three different companies that have our patterns. Check with us first to see if we have one in stock. If we don't have the color you want, then we can either order it or direct you to one of our three case makers. The picture above shows the "one-piece" case (which has a special pocket on the bottom to slip in a wheel cart). Ask about our "two-piece" case (which makes loading the harp into the case easier).

See order form for prices.

Where can I get extra strings for this harp?

We will give you an extra set of regular nylon strings along with a tuning wrench. If you would like an extra set of the special low wound strings, they can be purchased directly from us.

ENO ET-3000A Electronic Tuner

If you want to change the frequency from 440 to 432 or something different, then you'd want to get this model (shown left), so that you can change it with the arrow buttons.

Another option is to download the "Piano Tuner" app on your cell phone (which works well if you're in a quiet room by yourself).

How do you receive payment?

Since we are a small family business, we take credit cards only through PayPal for small harps (the PayPal service fee is added to your total). For this type of harp, our U.S. customers send us either a personal check or a bank money order made payable to Marini Made Harps. For international customers, after your order is confirmed we would email you our special bank information for payment directly to our special account that we have set up for this (a small bank fee is added to your total). So, first you would email us your request with the order form filled out, and then we will email you back an invoice with everything listed and a final total. Once this is done, then we would proceed with your harp order. If the harp you want is available, then we would ship the harp to you once we receive payment. If we still need to make the harp, then we will notify you about 1 to 2 weeks before construction begins so that you can mail (or wire) us your payment.

Thank you for your interest in our Roma Bella Harp... we hope that we can serve you!

The Marini Family
