

Ordering a 34-String Ultra-Lite Harp

Updated: March 7, 2024

Frequently asked questions...

What comes with the 34-String Ultra-Lite Harp?

The **34-Ultra-Lite Harp** starts at a Low C and goes to a high “a” and is 51” tall, 15” wide, 26” deep, and is 19 lbs. It was specially designed for those who want a light weight harp that they can easily carry around. We give a set of nylon strings (does not include the low special strings) and a tuning wrench. More on strings below. **See order form for prices.**

What other woods are used to make this harp?

Natural Cherry, semi-gloss Black Walnut, semi-gloss African Mahogany, semi-gloss

(Note: there is an extra fee for walnut and exotic woods)

What kind of finish do you use on this harp?

A semi-gloss finish is the standard, but we can do a high-gloss finish for an extra fee. Both the semi-gloss and high-gloss finish protect the harp, but the high gloss finish is more shinny.

Can I add a Mic Pick-up?

Yes, for an extra fee we can add a mic pick-up which includes K&K Big-Twin transducers added to the inside of the sound board, and a metal jack on either the right or left side (bottom) of the harp.

What kinds of levers are available for this harp?

Gold Truitt Levers

Silver Rees Levers

**Shown Above: Gold Forte Levers
Silver Forte Levers are also available**

Note: You can get a full set of levers or partial (such as C+F's or C,F+B)

For prices see order form.

We can also put blue and red Bands on the C+F's on the gold Forte and silver Rees levers. The Forte also provide red and blue levers for the C+F's upon request.

Can I get a padded case for this harp?

You can purchase a special padded case from us. We have three different companies that have our patterns. Check with us first to see if we have one in stock. If we don't have the color you want, then we will direct you to one of our three case makers. The picture above shows the "one-piece" case (which has a special pocket on the bottom to slip in a wheel cart. Ask about our "two-piece" case (which makes loading the harp into the case easier).

See order form for prices.

Where can I get extra strings for this harp?

We will give you an extra set of regular nylon strings along with a tuning wrench. If you would like an extra set of the special low wound strings, they can be purchased directly from us.

What type of electronic tuner do you recommend?

ENO ET-3000A Electronic Tuner

If you want to change the frequency from 440 to 432 or something different, then you'd want to get this model (shown left), so that you can change it with the arrow buttons.

Another option is to download the "Piano Tuner" app on your cell phone (which works well if you're in a quiet room by yourself).

How do you receive payment?

Since we are a small family business, we take credit cards only through PayPal for small harps (the PayPal service fee is added to your total). For this type of harp, our U.S. customers send us either a personal check or a bank money order made payable to Marini Made Harps. For international customers, after your order is confirmed we would email you our special bank information for payment directly to our special account that we have set up for this (a small bank fee is added to your total). So, first you would email us your request with the order form filled out, and then we will email you back an invoice with everything listed and a final total. Once this is done, then we would proceed with your harp order. If the harp you want is available, then we would ship the harp to you once we receive payment. If we still need to make the harp, then we will notify you about 1 to 2 weeks before construction begins so that you can mail (or wire) us your payment.

Thank you for your interest in our Bass Minstrel Harp... we hope that we can serve you!

The Marini Family
